

AYOUB ALMOBARAKI

FULL-STACK DEVELOPER | REACT • NODE.JS • EXPRESS.JS • SPRING BOOT • POSTGRESQL

Agadir, Morocco | ayoubpro183@gmail.com | LinkedIn | GitHub | Portfolio Website

PROFESSIONAL SUMMARY

Product-minded Full-Stack Developer specializing in crafting high-fidelity user interfaces and highly responsive web architectures. Seamlessly bridging the gap between engineering and functional UI layouts, I specialize in leveraging React, TypeScript, and modern styling frameworks to build intuitive, accessible, and fast web experiences backed by robust Java/Spring Boot and Node.js microservices. Passionate about clean code, performance optimization, and implementing scalable application logic that directly elevates the user experience.

TECHNICAL SKILLS

Frontend & UI:	React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive & Mobile-First Design, Typographic Hierarchy, Micro-interactions
Backend & Databases:	Java, Spring Boot, Node.js, Express.js, RESTful APIs, Spring Security, JWT Authentication, PostgreSQL, MongoDB, MySQL, Neon.tech, Supabase
Tools & Workflows:	Git, GitHub, Bruno, Swagger/OpenAPI, VS Code, IntelliJ IDEA

PROFESSIONAL EXPERIENCE

Software Development Intern

April 2025

UltraSoft XP SARL

Agadir, Morocco

- **Collaborated** closely with technical teams to translate baseline wireframes into pixel-perfect, responsive interfaces, boosting client-side rendering speed by **15%**.
- **Engineered** reusable frontend layouts and modular UI components in React, establishing structural consistency across high-traffic screens.
- **Architected** defensive, highly reliable client-side API integrations with backend microservices, introducing comprehensive fallback states (empty states, skeletons, dynamic API error boundaries) that minimized user friction and layout shift.
- **Identified and resolved** deep-seated UI data flow bottlenecks and cross-browser rendering inconsistencies, improving interface performance on lower-end mobile devices by **20%**.
- **Participated** in structural code reviews and aligned closely on team-wide Git and GitHub version control workflows, streamlining code quality and release predictability.

FEATURED CASE-STUDY PROJECTS

CampusNest — High-Fidelity Student Living Platform

[GitHub](#)

An intuitive, end-to-end web platform built to solve fragmented off-campus student housing searches.

- **Interface Architecture:** Crafted a crisp, card-based responsive search layout built with Tailwind CSS, supporting a seamless state machine displaying content across 10+ operational pages.
- **Implementation:** Built a modular React SPA frontend entirely from scratch; designed a secure Node.js & Express.js REST API with structured MongoDB Atlas document models for high-speed dynamic querying.
- **Metrics & Performance:** Reduced page-load times by **25%** through localized image caching and asset optimization, yielding a Lighthouse mobile-accessibility score of **92%**.

ILEIC — Multi-Centre School Management System

[GitHub](#)

A multi-tenant management platform built to centralize operational pipelines and academic data flow across multiple training centers under a single administration.

- **Interface Architecture:** Engineered role-specific interactive portals (Admin, Secretary, Trainer, Student) utilizing strict typographic hierarchies, clean dashboard views, and responsive schedules to simplify complex operational pipelines.
- **Implementation:** Built dynamic schedules, student registration, and grades/absence trackers in React. Backed by a secure Java/Spring Boot engine managing role-based access control with short-lived access tokens and revocable refresh tokens.
- **Metrics & Performance:** Built automatic at-risk flags (10+ unjustified student absences) and database grade range validations, saving administration teams up to **4 hours** weekly of manual audit and operational coordination.

EDUCATION

Bachelor's Degree in Software Development

Graduated: July 2026
